# TRANS SIB

## Company History:

- The story of TRANS SIB ATC Air Service GmbH begins on March 20th 2001 with the opening of the Head Office in Nuremberg.
- In August 2002 a subsidiary was officially opened at Frankfurt-Hahn Airport. The subsidiary handles import and export.
- In September of 2003 TRANS SIB expands by buying three vehicles of their own.
- In April of 2004 TRANS SIB carries out their first tours to Frankfurt, Nuremberg and Munich themselves. Since then the company has been growing constantly and expanding its motor pool.
- Currently the TRANS SIB motor pool consists of 23 semi cabs and a small transporter. The semi trailers can be divided into mega trailers and mega cooler units both equipped with Roller Beds. Furthermore, GPS is available in all vehicles.
- During this time the staff has grown from 5 to 38. Specialized software has been developed and implemented enabling online tracking of freight transport.

## What makes us so exceptional?

### For our customers we developed and implemented:

- Around the clock information service. The customer has the possibility to track the goods from the moment the truck is loaded until it reaches the warehouse at its destination.
- GPS-Monitoring and mobile telephone connection to each and every driver.
- On-going tracking system of goods movement throughout the entire transportation route.

Due to our many years of experience in the area of national and international transport of goods we are in a position to offer our customers a wide range of freight forwarding services. Since its founding, TRANS SIB has established itself as a dependable partner within the logistics market. Our young and highly qualified staff is able to handle complicated transports quickly and professionally. Customer Service is our highest priority. Individual and meticulous service for our customers is what sets us apart from our competitors. We use modern and effective logistics solutions in planning the transport of your goods.
